

Building Automation for Offices and Training Rooms

Austrian Airlines AG

A Pleasant Indoor Climate With atvise®

In collaboration with nxtControl GmbH and Bachmann Visutec, Csernohorszky installed a state-of-the-art building automation system for 140 offices and training rooms at their new training center. The system includes a room reservation application and visualization based on atvise. Thus, every user with the necessary rights has full control over the building automation at Austrian Airlines, independent of terminal devices and from any location.
