# Ropeway Visualizations

 Doppelmayr Seilbahnen GmbH

## SCADA for Ropeways

As a quality, technology and market leader in ropeway installations, Doppelmayr / Garaventa operates production sites as well as sales and service branches in more than 50 countries worldwide. To date, the company has built over 15,100 ropeway systems for customers in 96 countries.

## "Doppelmayr Connect – Welcome to the Future"

The latest generation of the Doppelmayr cableway control system – "Doppelmayr Connect" – is actively supported by atvise® scada, which is installed on the control terminal.

## Available visualization functions:

- Clear and customizable user interface design
- Intuitive and logical navigation: flat 2-level menu navigation
- Notification Center: error messages, warnings and information are always clearly displayed to employees
- SolutionCenter: innovative support with daily operations and quick troubleshooting
- Integrated electronic manuals and schematics
- Data recording for statistical evaluations possible (trend analyzes, operating conditions at the plant, etc.)
- Pre-assigned announcements for passenger information
- 21.5" touch screen with Full HD resolution, made from high quality glass and brushed aluminum (OT1300 series by Bachmann electronic)
- Mobile application on tablet via your own WLAN: freedom of movement makes operation and maintenance easier
