# Hospital Room Control

— Siemens Switzerland Ltd, Building Technologies Division

▶ Room control with atvise® –  
via terminal or iPad –  
independent of accessing  
device and location

## Device Independent Room Controls

At Siemens Switzerland Ltd, Building Technologies Division atvise® webMI is used within building automation, where it is deployed on panels and via iPads exclusively for project-related control room operation and monitoring.

„Intuitive user interfaces with touch panels simplify room operation considerably, and by using atvise® software we can meet the most diverse requirements. We were convinced by the consistent use of open standards, which we have been pursuing at Siemens for many years, as well as the simplicity of the atvise® software“, says Pius Widmer, Global Portfolio Manager Room Solutions at Siemens.
